The Next Generation of Joint Health

Dear Doctor,

Your patient is considering using ACTIVE-8™ to address joint pain, stiffness & increase joint flexibility, safely and naturally.

The following is an overview of the safety and efficacy of our ACTIVE-8™ supplement. This formula is clinically supported in multiple Randomized Clinical Trials to reduce joint pain & stiffness, increase flexibility and range of motion safely and naturally.

Here's what makes ACTIVE-8™ different from other joint health supplements on the market:

- 1. Science:** The inclusion of three clinically studied patented & trademarked ingredients with 25 clinical studies between them.
When health, performance and mobility are compromised, rely on the most advanced and clinically studied ingredients to reduce joint pain & inflammation while increasing flexibility and range of motion. Regardless of age or activity level, ACTIVE-8™ can be used as a treatment option to recover from an injury and achieve peak performance fast.
- 2. Powder vs Pills:** The performance of ACTIVE-8™ has been further optimized through the choice of delivery system. The main advantage is that when the powder is mixed with a liquid it becomes even easier and quicker for the body to absorb. Additionally, powder supplements can be easier on the stomach and digestive system. This means that when your body requires specific nutritional support a powdered product delivers that support faster and more effectively than a pill.
- 3. Informed Sport Certification:** The Informed Sport logo is a mark of absolute quality and assurance for consumers and athletes from grassroots to elite. All Informed Sport-certified products must be tested before release to market, giving athletes and consumers complete confidence in the supplements they choose for training as well as competition.

Products certified by Informed Sport demonstrate the sports supplement industry's highest level of commitment to quality assurance.

ACTIVE-8™ is a breakthrough formula. A unique combination of clinically and scientifically supported ingredients from the market leaders, **NEM™** brand (*Natural Eggshell Membrane*), **AvoVida®** brand - ASU (*Avocado Soybean Unsaponifiables*) and **UC-II®** brand undenatured type II collagen in the proper dosages used in human clinical studies to support results.

ACTIVE-8™ also contains a unique proprietary *Joint-Relief Blend* of the well-researched nutrients Ginger root powder - Turmeric root extract - Boswellia resin - White Willow extract & Vitamin C, all shown to promote cartilage health, support flexible joints and help relieve joint pain and tenderness, safely & naturally.

| Supplement Facts | | |
|--------------------------------------------------------------------------------------------------|--------------------|---------------|
| Serving Size: 1 Scoop (5.7 g) | | |
| Servings Per Container: 30 | | |
| | Amount Per Serving | % Daily Value |
| Calories | 15 | |
| Total Carbohydrate | 3 g | 1%* |
| Total Sugars | 1 g | † |
| Includes 1g Added Sugars | | 2%* |
| Vitamin C (as ascorbic acid) | 504 mg | 560% |
| Calcium | 70 mg | 5% |
